

Researcher in the field of clinical epidemiology of HIV, STIs, and Viral Hepatitis (CEEISCAT - ICO Badalona)

Catalan Institute of Oncology

The Catalan Institute of Oncology (ICO) is a cancer monographic centre that serves nearly 50% of the adult population of Catalonia.

With more than 1500 professionals like you, we offer high-quality care; we conduct top-level research and constantly innovate thanks to the multidisciplinary approach and teamwork of our professionals.

Based in L'Hospitalet del Llobregat, Badalona, Girona, and Tarragona-Terres de l'Ebre, we work in a network with four university hospitals and over 20 regional hospitals to provide the best treatment, ensuring equity for our patients, regardless of where they live.

Job Description

The Catalan Institute of Oncology (ICO) is initiating a selection process to incorporate a **Researcher for the Center for Epidemiological Studies on STIs and AIDS in Catalonia (CEEISCAT)**, a service of **ICO Badalona** that focuses its epidemiological research on HIV, STIs, and viral hepatitis.

Main responsibilities:

Integrate into the Monitoring of antiretroviral treatments for HIV and its comorbidities at CEEISCAT and contribute to the implementation processes, data management, and analysis of a prospective and multicentric cohort of people living with HIV in Catalonia and the Balearic Islands (PISCIS cohort) with over 30,000 patients.

Promote the scientific relationship of the cohort with other national and international initiatives and identify and execute own research sub-projects.

Collaborate with other projects of CEEISCAT and contribute to the development of epidemiological indicators generated by the centre in its field of action.

Participate proactively in CEEISCAT activities, collaborate in promoting resource generation and scientific production, as well as support the Scientific Directorate in other tasks as required.

Conditions

Employment contract: Vacancy coverage.

Full-time employment (1,668 hours/year - 37.5 hours/week).

Incorporation date: After the selection process.

Requirements

Hold a Bachelor's/Graduate degree in Biomedical Sciences, preferably Medicine and Surgery (with a specialization obtained through MIR).

Demonstrated experience in the field of Clinical-Epidemiological Research with communicable diseases.

Proficiency in statistical packages R and/or STATA at user level.

Advanced level of English proficiency.

Additional Considerations

Specialization in Internal Medicine, Family and Community Medicine, and Preventive Medicine and Public Health will be valued.

Additional training in biostatistics, bioinformatics, Epidemiology, or Public Health, or Master's or Doctorate related.

Experience in database management.

Familiarity with the Catalan Health System and its information systems, as well as with national and state research structures and networks (AGAUR, CIBERESP, FIS, ...).

Participation in national and international research projects related to the job functions.

Participation in publications and/or presentations at conferences related to the job functions.

Demonstrate level C1 proficiency in Catalan or commitment to acquire it.

Documents to Submit

Curriculum vitae (without photograph) + cover letter.

Copy of documentation proving the requirements (degree + specialization) and most outstanding merits.

Submission deadline until 31/05/2024 at 14:00h.
